Growers for The Trade Exclusively

BOX 345, NEW BRUNSWICK, N. J.

TRADE PRICE LIST OF ROSES *and* HARDY PERENNIALS

WE ARE strictly growers and do not buy any stock.

All of our roses are two-year field grown, budded on Japanese multiflora, the best stock for the largest part of the U. S. It is hardy, vigorous and makes a splendid root system. It will do well on all soils and positively will not "sucker."

The roses are graded to a high standard and we know you will be pleased with our stock. Grown right here in New Brunswick, they are hardy and well ripened and will give universal satisfaction to your clients.

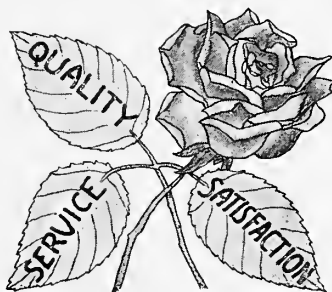

Each year we have a number of roses that do not come up to our standard for No. 1 grade. This No. 2 grade we offer at 50% less than list. They make splendid plants for potting up or lining out.

Where less than 10 of a variety are wanted add 5c for each bush. For less than 5 of a variety add 10c.

A hint: After you receive your roses, if it is intended to sell them dormant, they are best heeled in deeply, protected from all wind and severe changes in temperature, and kept shaded and well watered. Roses laid flat in a well-drained trench and covered with about 8 inches of soil, will carry through the winter in perfect condition.

HARDY PERENNIALS

==== *field-grown* =====

Our Perennials are thoroughly hardened field-grown stock, superior in every way to the pot grown cuttings or seedlings that many growers sell. We give liberal sized divisions that establish themselves quickly, and give splendid results their first flowering season.

We advise Fall or Early Spring planting. Varieties marked thus (*) are good for cutting.

BELLADONNA, Pfitzer's Improved Strain. A considerable improvement over the ordinary. Under good conditions they reach a height of 5-6 ft., and the flowers and spikes are much larger than the old belladonna. Quality cut delphinium always brings a good price, and we believe that after you have tried this you will no longer grow the old variety.

HARDY PHLOX (Phlox decussata)

These beautiful garden flowers become more popular each year and our supply of plants has never quite kept up with the demand. Our soil seems to be especially favorable to the development of a strong root system, and our stock this season is the best we have ever grown. The following list contains the cream of the better varieties.

WIDAR, slightly darker than the above with a white center.....	1.20	9.00
W. C. EGAN, delicate lilac, very fine; the individual flowers are very large	1.50	12.00

We would advise the use of considerable white in planting as this intensifies the colors.

Collection of 100 Phlox, in 10 varieties, our selection, \$8.00

Pfitzer's Improved strain of **DELPHINIUM BELLADONNA**

"We originally received the seed of this direct from the introducer, about three years ago. We have been testing and selecting since then and find that this is really a fine improvement on the old belladonna."

"The spikes and flowers are larger and the plants grow stronger. The loose flower arrangement of the belladonna is retained. Quality-cut delphinium always brings a good price, and with this improved form can be grown under ordinary conditions."
